

# WEBSITE DESIGN TASK 2

## Low-Fi Mockup

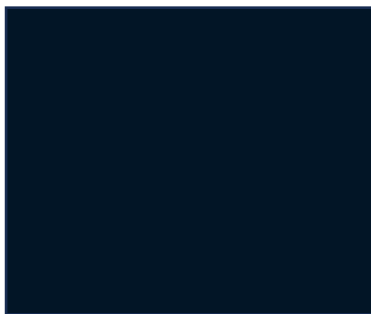

## Style Guide

### Color palette

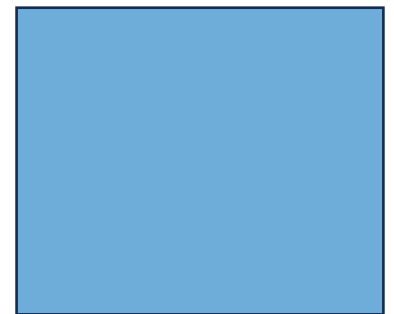

---

HEX: #021526

HEX: #03346E

HEX: #6EACDA

### Typefaces

---

- Arial, Helvetica, sans-serif, header will have fontsize of around 20px and the footer will have around 15px.

## Spacing rules

---

### **Header:**

- It will have padding of around 15px and auto margin with search container that will have margin of around 20px.

### **Body:**

- For the image containers and image links I will mostly use auto margin so it stays in the middle of the screen with the varying padding so the design looks neat.

### **Footer:**

- For the footer I will use auto margin so it stays in the middle of the screen

## Visual language

---

- I will be using real images and stock photos for visual language, photos will not have filters or editing.
- In the footer I will be using icons that are line style.

## Button and link styles

---

- For the links I will use clickable pictures that will take you to another page when pressed. On hover they will change border colors and they will zoom in.
- On the form I will have submit and reset buttons that will change color on hover.

## Hi-Fi Mockup
